Recruiter

Cadence

Boulder, OR

Dear recruiter,

I was excited to learn of the opening of Technical Project Manager within your organization.

My background includes a Bachelors degree in Computer Science and Engineering from the University of Pennsylvania (Ivy League), some undergraduate course work in Computer Science from Drexel University (another well-reputed Engineering school), work experience as a Sr. Software Engineer/Sr. Programmer/Software Engineer and a Systems Analyst at firms like Answernet Inc, CBA Industries Inc, Tristar Fulfillment Services Inc, Dial Connections Inc, CareScience Inc, Marshall & Swift/Boeck, RSystems Inc, MDRx Research and Financial Inc, SAP America and a project in Java with the United States Air Force. While I do not have any direct technical project management experience, I have assisted project managers with project management duties and activities in my role as Sr. Programmer and Sr. Software Developer at Answer Net Inc, CBA Industries Inc and Dial Connections. I am also working towards obtaining my PMP certification. My past work experience spans various front-end as well as back-end

projects in health-care, real-estate appraisal, retail, ERP Software and defense working with front-end technologies such as HTML, HTML 5, CSS, JavaScript, AJAX, JQuery, Backbone.js, AngularJS and Typescript.

I think I will be an excellent fit as Technical Project Manager in your organization and a valuable addition to your team. Please let us set up some time to chat on the phone.

Best regards,

Saad Masood
